Nature is not something far from us, but it's our home, the air we breathe, the water we drink and...

# Nature Through Their Eyes

## Keywords

**photography • nature • school • teamwork • social media •**

**1. Observe and take photos of natural wonders**

Take students outside, in your school yard or a green area close to the school and invite them to look closely for interesting examples of everyday nature. Take photos of their findings and encourage children to observe and appreciate the small things around them.

The key to this activity is to turn the ordinary into something special by capturing it in photos and/or videos. These could be bugs, a snail shell, strangely shaped clouds or leaf patterns.

**2. Remember:**

- Be mindful of nature's needs: don't pick plants or disturb animals.
- This is about everyday wild nature, not domestic animals or plants at garden shops, etc.
- These must be genuine photos; AI-generated images are not accepted.

**3. Select your best shots**

Back inside, select your best photos as a class. Make an activity of it and invite discussion, choosing, and naming your final photo selection. This could be something connected to the feelings the picture/video gives them or even a subject they liked a lot. Afterwards, submit everything to the coordinator

**4. Display your work**

The Dinja Waħda Coordinator creates a digital or physical display of submissions and shares it with the school and the school's website/social media channels. Tag Dinja Waħda using:

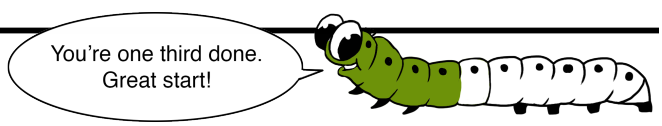

- Facebook: @dinjawahda, @birdlifemalta, #dinjawahdareel
- Instagram: @dinja_wahda, @birdlife_malta

## Send photos of

- ☐ Children taking photos outside
- ☐ Final school display
- ☐ Children selecting their favourite photos

## Resources & Equipment Needed

Nature is not something far from us, but it's our home, the air we breathe, the water we drink and...

# Nature Through Their Eyes

- Mobile phone, tablet or camera
- Optional: Simple editing app (e.g. Capcut or Canva)
